## Operating Room Towels

- This towel is designed to be absorbent with low linting properties.
- Note: It is important never to wash OR towels with terry towels, as the lint from the terry towel may transfer onto the OR towel.

------------	---------	--------------	----------	----

### How to Measure for a Tablecloth

To determine what size tablecloth is best for your needs and your table, you will need to know 2 things:

1. The length and width of your table or, if you have a round table, you will need to know the diameter.
2. How far down off the edge of the table you want the tablecloth to drape (this is called the "drop")

• A common "drop" is 10"-12".

• For a cloth that goes to the ground, the common drop would be 30" to a floor that is not carpeted.

### Ordering Square, Rectangle or Oval tablecloths

Since the drop is on both sides of the table, multiply the drop by 2 and add this measurement to both the width and length.

For example, your table is 48"x84". If you want a 12" drop, multiply 12 x 2 (24) and add 24 to your width (72") and length (108"). Thus, the cloth should be 72"x108".

### Ordering Round tablecloths

For a round tablecloth, multiply the drop by 2 and add this number to the diameter

For example, a 60" round table with a 15" drop would be a 90" round cloth.
